What does Brexit mean?

The development of the EU proceeds in high speed and EU issues are complex in nature. Many times school teachers struggle to answer specific question regarding EU topics in school lessons.

The IAT offers academic help in this situation. School seminars in political education can address specific questions on complex EU topics, which they cannot answer themselves or where the answers they found in internet research is not satisfying, to the academics of the “EU Expertise at School”. Those answer the question asap in form of a (video) podcast which is placed at the website and can be than used within the school seminar to completely understand the topic in question.
